

Plas Potatoes

Plas - varieties: a good start for a good crop

Plasandes

Variety	Plasandes (not yet on List of Varieties)
Crossing	AM-78-4102 x Gloria
Breeder/repres.	Diny Plas
Suitable for	starch (other uses not yet tested)

Variety properties

Maturity	late (3,5)
Dormancy	long
Foliage development	very good (9)
Skin colour	yellow
Flesh colour	fairly yellow (7)
Tuber shape	oval
Shallowness of eyes	rather shallow (7)
Number of tubers	7
Tuber size	7
Yield	high (8)
Dry matter content	high (8)

Resistances

Leaf roll	7
Virus A	7
Virus X	7
Virus Yn	7,5
Leaf blight	7
Tuber blight	7,5
Common scab	7
Internal bruising	7
Potato cyst nematode Ro1	9 (resistant)
Potato cyst nematode Ro2/3	
Potato cyst nematode Pa2	7
Potato cyst nematode Pa3	8
Wart disease fysio 1	1 Test res.*
Wart disease fysio 2/6	9
Wart disease fysio 18	1 Test res.*

* End-tests not yet ready

* Variety is 'sister' of Plasinka - Nem.res. is different
