

Plas Potatoes

Plas - varieties: a good start for a good crop

Plasent

Variety	Plasent (List of Varieties 2007)
Crossing	Producent x AM-66-42
Breeder/repres.	Diny Plas
Suitable for	starch (other uses not yet tested)

Variety properties

Maturity	medium late (5)
Dormancy	long (7)
Foliage development	fairly good to good (7,5)
Skin colour	yellow
Flesh colour	fairly yellow (7)
Tuber shape	round-oval
Shallowness of eyes	moderately deep (6)
Number of tubers	7,5
Tuber size	7
Yield	good (7,5)
Dry matter content	good (7,5)

Resistances

Leaf roll	6,4
Virus A	fairly good resistance
Virus X	8,5
Virus Yn	6,5
Leaf blight	6
Tuber blight	8
Common scab	fairly good resistance
Internal bruising	fairly good resistance
Potato cyst nematode Ro1	9 (resistant)
Potato cyst nematode Ro2/3	9 (resistant)
Potato cyst nematode Pa2	8
Potato cyst nematode Pa3	
Wart disease fysio 1	1 Test res.*
Wart disease fysio 2/6	9
Wart disease fysio 18	9

* End-tests not yet ready
